Wait! Are you sure that goes in the

GREEN BIN?

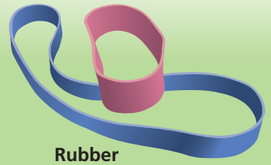
Show your green bin the love it deserves.
Only accepted compostables go IN the BIN.

Putting contaminants in the Green Bin can spoil the whole load

The content from green bins is taken to compost facilities. If the material is contaminated with items that don't belong, the whole load may need to be thrown in a landfill, or inappropriate materials could end up in the finished compost and decrease its value.

Please don't put anything in the green bin unless you are sure it belongs there.

Twist ties and produce stickers



Rubber

Cigarette butts

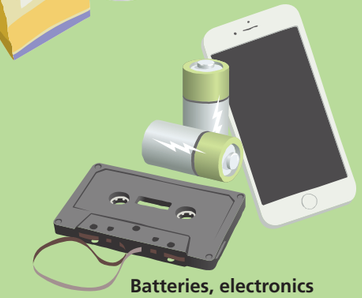
Plastics of any kind

Milk, juice cartons and pop cans

Food packaging

Sanitary products and diapers

Cutlery



Batteries, electronics and audio/video tapes

Glass

Hazardous materials, bleaches and cleaners

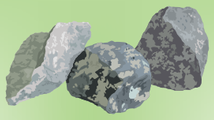
Painted or treated wood

Cotton swabs, dental floss

Textiles and carpets

Medicines or drugs

Metals



Rocks

Biodegradable does NOT mean Compostable

If it's labelled biodegradable, it probably belongs in your garbage.
